DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species 1 is represented by figures 1 and 2.
- Species 2 is represented by figure 3.
- Species 3 is represented by figure 4.
- Species 4 is represented by figure 5.
- Species 5 is represented by figures 6 and 7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3723

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- Claims 4, 5 and 11-13 correspond to species 1.
- Claims 4, 5 and 15 correspond to species 2.
- Claims 4 and 6 correspond to species 3.
- Claims 10 and 14 correspond to species 4.
- Claims 8 and 10 correspond to species 5.

The following claim(s) are generic: 1-3, 7, 9 and 16.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species either uses a different sanding machine, actuates the activation regions using different mechanisms and/or has different structure for the activation regions.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
